Self-assessment	I mastered the learning objective today.	I am almost there.	Need more practice and feedback.
Teacher feedback	You mastered the learning objective today.	You are almost there.	You need more practice and feedback.

1. Simplify each expression below.

a. $34 \times (-8)$

$$\begin{array}{r} 34 \\ \times 8 \\ \hline 272 \end{array} \quad -272$$

b. $-12 \times (-19)$

$$\begin{array}{r} 12 \\ \times 19 \\ \hline 108 \\ 228 \\ \hline 228 \end{array} \quad (228)$$

2. What will the sign of the product of the expression below be? Justify your answer.

$(-5) \times 22 \times 18 \times (-4) \times (-27) \times (-41)$

- a) positive
- b) negative
- c) no sign – the answer is 0
- d) unable to determine – need more info

$(-) \times (+) = (-), (+) \times (-) = (-), (-) \times (-) = (+), (-) \times (-) = (+), (-) \times (-) = (+)$

$$\begin{array}{r} 22 \\ \times 8 \\ \hline 176 \end{array}$$

$$\begin{array}{r} 110 \\ \times 18 \\ \hline 220 \\ 1980 \\ \hline 1980 \end{array}$$

$$\begin{array}{r} 2280 \\ \times 4 \\ \hline 9120 \end{array}$$

(-1107)

(-110)

-5 (negative) times 22 (positive) would be negative, and a negative times a positive equals a negative. A negative times a negative equals a positive, but a positive times a negative equals a negative. Finally, a negative times a negative equals a positive product.
